

Multi-Sport Scoreboard

HMI Technologies' Multi-Sport Scoreboard and companion shot clocks are all wireless so that you can place them anywhere in your gym.

The Scoreboards are flexible enough to score a wide range of sports and are well constructed with built in handles or wall mounting brackets.

The scoreboard and shot clocks can be controlled from one central universal wireless controller. Alternatively, for more complex scoring or (for example) displaying penalties separately, a shot clock controller can also be purchased.

Specifications
