

8x32vms

VMS

Variable Message Sign

The 8x32 VMS is highly versatile allowing HMI to customize the sign specific to your needs. With the ability to be linked or stacked, multiple signs can at once display the information that you need your customers to see.

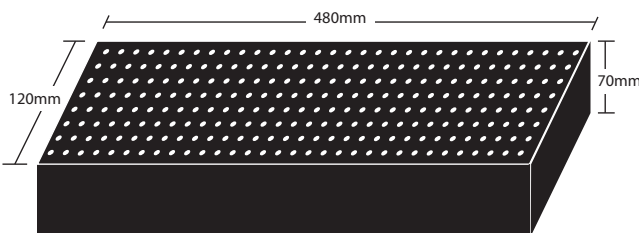

Features

- Super bright LEDs
- User programmable graphics
- Indoor Ticker option
- Fully linkable display >
- Built in computer port
- Insert time & date

Any number of 8x32 signs can be linked or stacked with seamless graphics. This example of 3 signs creates an 8x96 pixel 1.44 metre long display.
